

CONNECTING TO THE SERVER

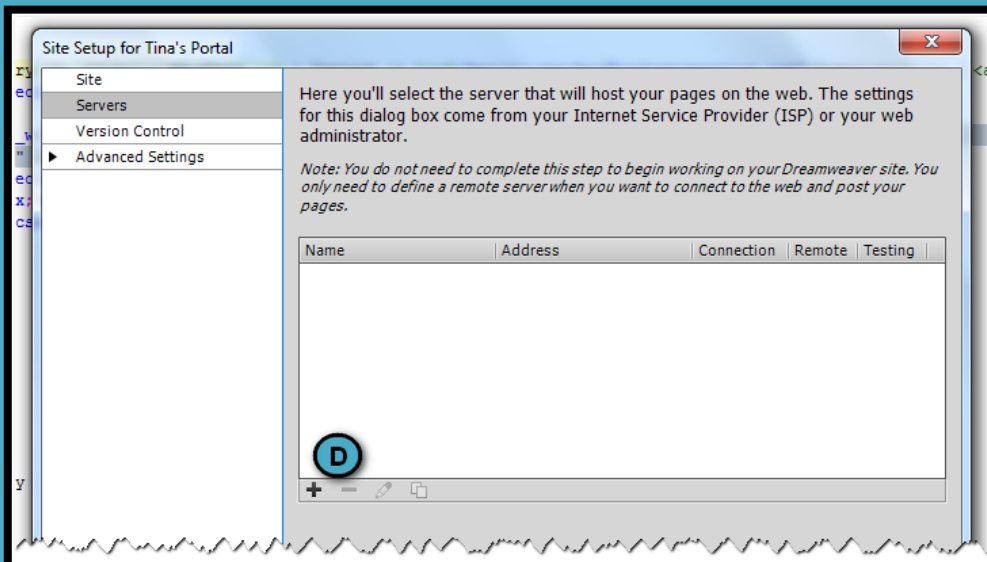

1. Create (or download) the site folder to your U:/ drive.
2. Open Dreamweaver.

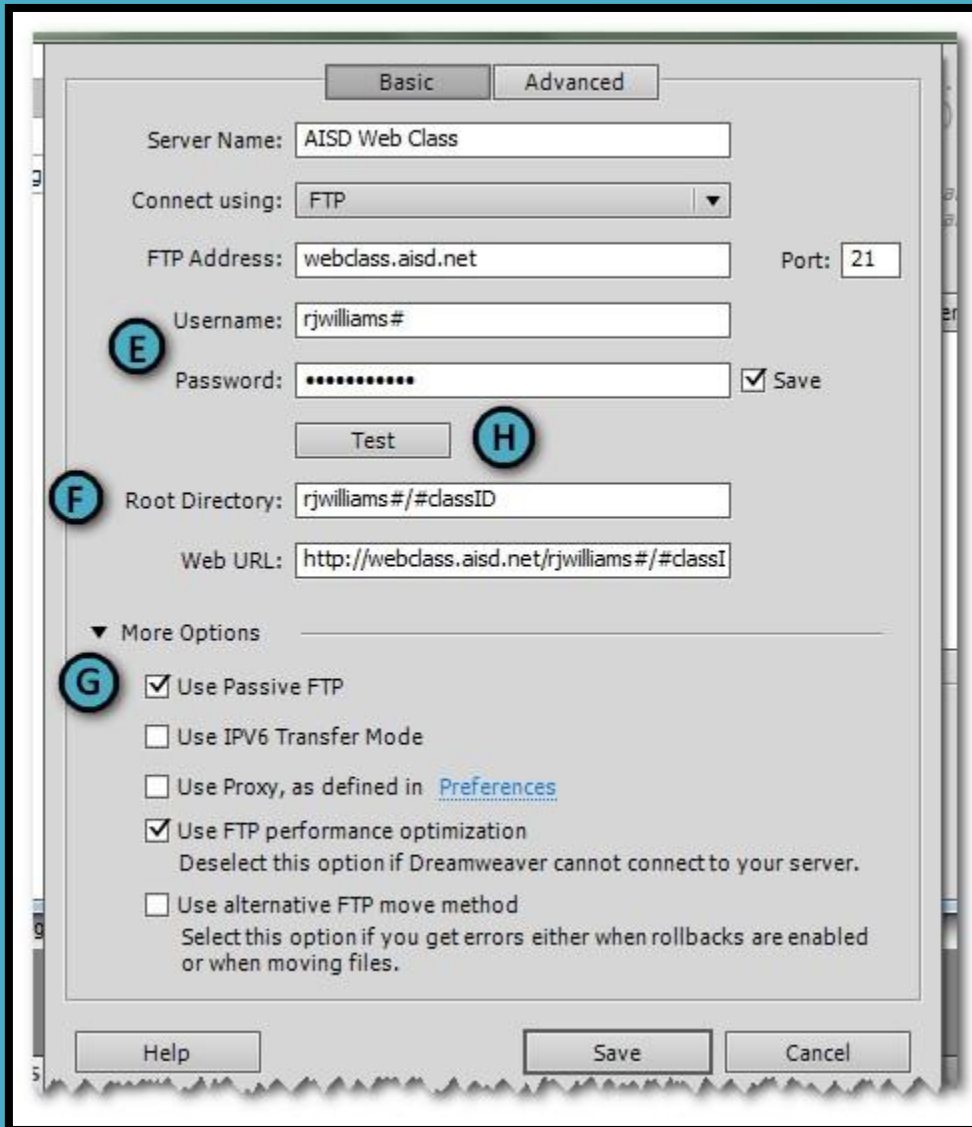

3. Choose **Site > New Site**
4. Type in your name (A).
5. Click the folder icon to locate the site folder in your U:/ drive (B). This should be under **PROJECTS**.
6. Choose **Servers** on the left (C).

7. Click the plus (+) sign to create the connection (D).

- Fill out the information below (E) (F). The # sign represents your class period. (i.e. 2nd period would be **rjwilliams2/2classid**). The Username, Password and beginning of the Root Directory are the same.
- Check **Use Passive FTP** under More Options. (G)
- Test your connection. (H)

- Once you complete your work/changes, click the **UP** arrow (it turns blue when you hover over it). In the Files list, select the folder you wish to upload.
